### Changing the sample-set

Individual sample-sets can be changed using a dedicated external pen drive (or your own backup disc). The procedure is quite simple:

1. Switch off the organ expander, disconnect the power adapter.
2. Disconnect the USB/MIDI cable and connect the dedicated pen drive to an USB connector.
3. Connect the power source again: the logo appears on the screen. the organ expander starts automatically the updating procedure within several seconds.
4. After the process is completed, a main screen appears on the screen. The new sample-set is ready now.
5. **REMOVE** the pen drive, connect the USB/ MIDI cable again and replace the magnetic labels above the stop tabs.

**WARNING:** user settings will be replaced by default values during the process. So correct MIDI channels must be set again.

Labels for 25 mm magnetic strips or 20 mm magnetic C profile rails

Print in 100% measure!!!

Principal. 16'	Subbass 16'	Bassflöte 8'	Posaune 16'	II:P	Principal 8'	Salicional 8'	Hohlflöte 4'
