## Changing the sample-set

Individual sample-sets can be changed using a dedicated external FLASH disc. The procedure is quite simple:

1. Switch off the organ expander, disconnect the power adapter.
2. Disconnect the USB/MIDI cable and connect the dedicated FLASH disc to the USB connector.
3. Connect the power source again - the logo appears at the display. Within several seconds, the organ expander starts automatically the updating procedure
4. After the process is completed, a main screen appears at the display. Now the new sample-set is ready.
5. **REMOVE** the flash disc, connect the USB/MIDI cable again and replace the magnetic labels above the stop tabs.

**WARNING:** user settings are replaced by default values during the process. So correct MIDI channels must be set again.

Labels for 25 mm magnetic strips or 20 mm magnetic C profile rails
